Professional Interests

- Contributing to Open Source Projects
- Exploring and Learning New Technologies

Projects

Kareer Guide, *Technologies: TypeScript, WebScraping*

- Designed and developed a web application that analyzes user resumes and recommends job opportunities best suited to their skills, qualifications, and experience.

Neo Booth Web Application, *Technologies: Next.js, Tailwind CSS, JavaScript*

- Planned and designed a modern 3D-style photo booth application inspired by online photobooth platforms, allowing users to capture, customize, and download photos without storing user data.

Emotion Sakura, *Technologies: Python, OpenCV, TensorFlow*

- Designed and developed an interactive platform where emojis dynamically change based on the user's facial emotions and expressions using real-time emotion detection.

Kisan Sathi - Smart Farming Support Platform, *Technologies: HTML, CSS, JavaScript, PHP, MySQL, Exotel*

- Developed a multilingual farming support platform that helps farmers with district-wise crop suggestions, cultivation guidance, investment estimation, and expected profit analysis.
- Added an agricultural vehicle booking system for tractors, cultivators, and harvesters with dynamic pricing and payment functionality.

Skicast, *Technologies: HTML, CSS, NodeJS, Weather API*

- Built a responsive weather web application that allows users to view real-time weather conditions based on their current location and check detailed weather forecasts for the next 7 days.

Black Vortex - Business Portfolio Website, *Technologies: HTML, CSS, JavaScript*

- Designed and developed a modern dark-themed responsive company website for showcasing website and app development services with animated UI effects and mobile-friendly layouts.

Agricultural Vehicle Booking Platform, *Technologies: HTML, CSS, JavaScript, PHP*

- Developed a booking system that allows users to rent agricultural vehicles such as tractors and harvesters on an hourly basis, with pricing calculation and booking confirmation features.

MHR Facility Service Website, *Technologies: TypeScript, Supabase*

- Developed a facility management and home cleaning service website with image upload sections, service management, and responsive UI for internal team operations.

Certifications

- Artificial Intelligence
Fundamentals course from IBM
SkillBuild

Hackathons & Workshops

National Level Hackathon, Vignan Institute of Technology
